The screenshot shows the SiteGround account management interface. At the top, there's a navigation bar with links for Home, My Accounts (which is currently selected), Support, Billing, Referral Deals, Add Services, and Resources. On the right, there's a user profile section with a placeholder profile picture, the text "Hello, Sunhong Ahn", and links for "My Details" and "Logout".

The main content area is titled "MANAGE ACCOUNT: SKECA.ORG". It displays information about a GoGeek account: Type: GoGeek account | Started: Aug 18, 2014 | Expires: Aug 18, 2015 | Status: Active. Below this, there are three buttons: "Go to cPanel" (highlighted with a red box), "Renew", and "Upgrade".

Under the account information, there are three sections for WordPress installations:

- http://skeca.org**: Version 4.1. Buttons: "WordPress Toolkit" and "Go to Admin Panel".
- http://servant.skeca.org**: Version 4.0. Buttons: "WordPress Toolkit" and "Go to Admin Panel".
- Add Installation Manually »**

At the bottom, there's a "DOMAINS" section with the text "Domain Services with SiteGround".

Subdomains

Subdomains are URLs for different sections of your website. They use your main domain name and a prefix. For example, if your domain is skeca.org a sub-domain of your domain might be support.skeca.org.

Subdomains are relative to your account's home directory. The icon signifies your home directory which is /home/skecaorg.

The screenshot shows the SiteGround control panel interface. At the top, there's a navigation bar with links for Home, My Accounts, Support, Billing, Referral Deals, and Resources. On the right side of the header, there's a user profile icon with the greeting "Hello, Sunhong Ahn" and links for "My Details" and "Logout". Below the header, the main content area features a blue banner with the word "Softaculous" in a script font. Underneath the banner, there are several icons representing different software options. To the left, a sidebar lists various application categories with corresponding icons: Blogs, Micro Blogs, Portals/CMS, Forums, Image Galleries, Wikis, Social Networking, Ad Management, Calendars, Gaming, and Mails. The main content area is focused on the "WordPress" application. It displays the WordPress logo, a rating of 5 stars, the version 4.1, and the release date 18-12-2014. A prominent blue "Install" button is centered at the top of the page, with a red box drawn around it to highlight it. Below the button, there are tabs for Overview, Features, Screenshots, Demo, Ratings, Reviews, and Import. A brief description of WordPress follows, mentioning it's a state-of-the-art publishing platform with a focus on aesthetics, web standards, and usability. It's described as both free and priceless. The text also notes its history starting in 2003 and becoming the largest self-hosted blogging tool in the world. At the bottom, it states that the GPL license from the Free Software Foundation is the license under which WordPress is released.

WordPress is a state-of-the-art publishing platform with a focus on aesthetics, web standards, and usability. WordPress is both free and priceless at the same time.

More simply, WordPress is what you use when you want to work with your blogging software, not fight it.

WordPress started in 2003 with a single bit of code to enhance the typography of everyday writing and with fewer users than you can count on your fingers and toes. Since then it has grown to be the largest self-hosted blogging tool in the world, used on hundreds of thousands of sites and seen by tens of millions of people every day.

The GPL from the [Free Software Foundation](#) is the license that the WordPress software is under.

>> 설치할 도메인 선택 (Choose Domain)

The screenshot shows the SiteGround control panel with the Softaculous application open. On the left, there's a sidebar with various software categories like Blogs, Micro Blogs, Portals/CMS, etc. The main area displays the WordPress installation page. It shows the version (4.1) and release date (18-12-2014). The 'Install' tab is selected. Under 'Software Setup', there are fields for 'Choose Protocol' (set to http://), 'Choose Domain' (a dropdown menu with options: skeca.org, skeca.org, servant.skeca.org, **jwhan.skeca.org**, youth.skeca.org, skeca.net, all of which are highlighted with a red box), 'In Directory' (wp658), 'Database Name' (wp658), 'Table Prefix' (sfl_), and 'Site Settings' (Site Name: My Blog).

>> 기본 설정 (Site Settings) / 관리자 설정 (Admin Account)

The screenshot shows the configuration page for a new WordPress site. On the left, there's a sidebar with various icons and links: E-Commerce, ERP, Guest Books, Customer Support, Frameworks, Educational, DB Tools, Music, Video, RSS, File Management, and Others. The main area has three tabs: Database Settings, Site Settings, and Admin Account. The Site Settings tab is active, showing fields for Table Prefix (8fl_), Site Name (My Blog), and Site Description (My WordPress Blog). A red box highlights these three fields. Below them is a section for Enable Multisite (WPMU) with a note about server requirements, which has a checkbox that is unchecked. The Admin Account tab is also active, showing fields for Admin Username (vfhnz), Admin Password (T\$Z31%\$CK7), and Admin Email (admin@jwhan.skeca.org). The Admin Password field has a green status bar indicating it is strong (60/100). A red box highlights all four fields in the Admin Account section.

Quark is your basic building block for creating beautiful, responsive custom themes. It's not a convoluted or confusing framework that's hard to learn or even harder to modify. It's a simple and elegant starter theme built on HTML5 & CSS3. Its base is a responsive, 12 column grid. It incorporates custom theme options that are easy to modify, a set of common templates, support for WordPress Post Formats and the gorgeous, retina friendly Font Awesome icon font. Quark is WooCommerce compatible, Multilingual Ready (WPML) and translated into Spanish, German and French.

This is a sticky post.

There are a few things to verify:

- The sticky post should be distinctly recognizable in some way in comparison to normal posts. You can style the .sticky class if you are using the `post_class()` function to generate your post classes, which is a best practice.
- They should show at the very top of the blog index page, even though they could be several posts back chronologically.
- They should still show up again in their chronologically correct position in time, but without the sticky indicator.

Limelight is a clean and modernistic WordPress theme. It can be used to create any type of website, thanks to its three beautiful color schemes and a multitude of customization options. From the included control panel you can change the sidebar location, add images for the homepage slider, add a favicon, create links to your favorite social media websites and much more. This WordPress theme also has three custom templates, one of which allows you to create a widgetized homepage. In addition Limelight looks great on all screen sizes and devices.

The screenshot shows the SoundCloud embed page. At the top, there are three tabs: 'Share', 'Embed' (which is highlighted with a red box), and 'Message'. Below the tabs, there are two preview options: a smaller one showing a thumbnail of a video and a larger one showing a video player with a play button and a waveform. A red box highlights the larger preview. At the bottom, there's a section titled 'Code & preview' with a code editor containing the following HTML:
